

### **STUDENT FUND RAISING ACTIVITIES**

- I. The board of education encourages the faculty and students to plan activities that can be included within existing budgeting appropriations. However, financial constraints may prohibit funding at an appropriate level. Therefore, the board of education recognizes that certain student groups have a legitimate need to raise funds to cover expenses for extra educational projects or activities.
- II. When organizing fund raising projects, emphasis should be placed on service-type projects where talents of students are used in positive, developmental ways.
- III. Student groups and staff should keep in mind the district commitment to avoid competition with local merchants, and to patronize local merchants and manufacturers when possible and reasonable.
- IV. Funds raised must be used only for school-sponsored and organized functions/projects.
