Beginning Photography (10-11-12)

One Year - 1 Credit

► ***Approved Career and Technical Education Course (Stevens only)***

This is an introductory course in black and white photography. You will utilize manually adjustable, 35mm cameras that give you the ability to change aperture and shutter speeds. Coursework includes the components and operation of the 35mm camera, reading light meters, making appropriate exposures, lighting techniques, characteristics of film and light sensitive materials, darkroom techniques, and presentation of final prints.

In the darkroom you will be processing film and printing on black and white photographic paper. Special techniques such as toning and other image manipulations will be covered. You will also be introduced to the world of digital photography through state of the art digital cameras and imaging software.

Developing your visual communication skills and fundamental composition techniques will be emphasized. This class will give you the ability to create uniquely artistic photographic images and will provide you with a fun and exciting way to communicate and share your ideas.

Advanced Photography (11-12)

One Year - 1 Credit

► ***Completion of Beginning Photography is essential for success in this class.***

► ***Approved Career and Technical Education Course (Stevens only)***

► ***This course may be taken more than once for credit.***

For students who have successfully completed Beginning Photography, this course offers the opportunity to continue developing a deeper understanding of the principles of photography through creative projects that stimulate and inspire you. You will also experience photojournalism and digital publishing opportunities in conjunction with the yearbook and school newspaper. Instruction will include advanced techniques in camera operations, calculating exposures, lighting, traditional darkroom techniques and advanced digital imaging through the use of various Adobe PhotoShop programs.

Class discussion will introduce photographic styles of both historical and contemporary photographers. Special darkroom techniques and digital manipulation are offered on intermediate and advanced levels.

Creative and critical thought are necessary, as well as a strong commitment of time and effort. All students will develop portfolios that reflect publishing experience, a mature artistic direction and personal photographic style, and a high level of craftsmanship.
