

## **BUILDINGS AND GROUNDS SECURITY**

Measures will be taken by the school administration to provide for the security of the district's buildings and grounds.

The board encourages the public to make safe use of the district's outdoor recreational facilities during daytime hours when these facilities are generally available for public use. When a school facility is closed for the night, school grounds and roadways are to be considered closed to the public except for scheduled activities.

School personnel have the authority to ask any person found on school property after hours to leave and to inform the police should the person fail to do so.

The board may resort to its legal rights to enforce structures against trespassing.

Upon leaving the building, room or office space unattended by an authorized person, staff members will ensure that all lights are out, equipment is turned off or on, as appropriate, all windows are closed and all doors are locked.

Under no circumstances will students be given permission to use any classrooms, laboratories, gymnasiums or any other school facilities or equipment without approved adult supervision.

Students will not be given any school keys for use beyond an immediate supervised situation.
