

FOOD SERVICES MANAGEMENT

The district's food service program will operate as an integral part of the total school program and will be governed by the same management principles and types of control as any other division. The district's Assistant Superintendent for Support Services will oversee the program.

The Student Nutrition Manager is charged with administering the total program, implementing board policy as it pertains to school food services and making recommendations pertaining to the program and food service personnel. Food service personnel in the schools will be directly responsible to the Food Service Manager in the school and the building principal.

School food services will be operated on a nonprofit basis and will comply with all rules and regulations pertaining to health, sanitation, internal account procedures and service of foods. Schools will meet all state and federal requirements necessary for participation in state and federal programs.

The building principal of each school, in conjunction with the Student Nutrition Manager and the Food Service Manager, are responsible for administering the program in the particular school. Where possible, the building principal will provide for coordination of the program with areas of instruction. The building principal will be responsible for student discipline in the cafeteria.

School food service receipts will be used only to pay regular food services operating costs. When food service facilities are used by outside agencies, an adequate fee will be charged. If facilities are used for other than the regular program, the Food Service Manager will ensure that no supplies provided for the regular program or United State Department of Agriculture (USDA) commodities are used.

The Rapid City Area Schools will implement an offer versus serve option as defined by USDA regulations. School food services will implement the offer versus serve option for all meals grades kindergarten through twelfth grade.
