Health Screening Programs

Our health screening programs may include vision, dental, height, weight, body mass index (BMI) and blood pressure. All kindergarten, first, third, and fifth graders will have health assessments with at least dental and vision screenings. Students referred to the school nurse by school staff may also have their vision screened. Parents will be notified by a phone call and/or a professional referral note if results are out of range. If you do not want your child screened, please notify the nurse directly. If you have any questions about screening, please talk with the school nurse.
